

Employment Growth Projections

Forecast by Business Lines within Organizations

Organizations' own projections of growth in their electricity sector workforces in two years and five years, expressed as a percentage of the current workforce. Forecasts of total employment (including all non-support and support occupations combined) within electricity-related business lines at organizations that responded to the survey. Vertically integrated organizations involved in the full range of activities in the electricity sector would have listed a separate portion of their employment in each line of business. Excludes contract workers, seasonal workers, and employment in company lines of business entirely unrelated to the electricity sector.
